

i-CSOC

CYBERSECURITY OPERATIONS CENTER

i-CSOC

Ciberseguridad

As a key part of its strategy of Cybersecurity, Indra, the premier Information Technology Company in Spain and a leading IT multinational in Europe and Latin America,

has launched a major state of the art operations centre (iCSOC) in Madrid. This centre disposes of an area of nearly 500 m2.

OBJECTIVES

The Indra CyberSecurity Operations Centre (i-CSOC) is established as a national and international reference center in Cybersecurity Managed Security Services Provider: security monitoring, security systems operation, vulnerability management and security incident management. Indra's Cybersecurity and Cyberdefence R & D center.

Lab environment to test new security products, perform malware and forensic analysis, and develop proprietary hardware and software solutions
Cybersecurity cloud services.
Cyberintelligence services in civil and military environments.

Physical environment and staff with appropriate security clearances to develop classified and security-sensitive projects.
Training for internal staff and customers.

i-CSOC

i-CSOC Services

i-CSOC MSSP

Managed Security Services.

- **Monitoring and correlation.**
- **Cybersecurity operation.**

i-CSOC LABS

The Cybersecurity Laboratory is an international reference in developing and testing Cybersecurity technologies. It comprises the following units:

- **Cybersecurity showroom and demo center.**
- **Certification and accreditation unit.**
- **Cybersecurity consulting.**
- **CRG cybersecurity research group.**

i-CSOC CyberIntelligence

The Cyberintelligence unit provides services related to the application of technology and intelligence processes to Cybersecurity.

- **Digital surveillance.**
- **e-Crime.**
- **Electronic fraud.**

i-CSOC CSIRT

The Computer Security Incidents Response Team (**i-CSOC CSIRT**) is responsible for implementing preventive and reactive controls to manage security incident.

- **Alert services.**
- **Ethic hacking and vulnerability analysis.**
- **Forensic.**
- **Rapid response team (RRT).**

i-CSOC TRAINING

Unit that comprises all activities and initiatives related to Cybersecurity training and communication/ dissemination of results and news produced within i-CSOC.

i-CSOC Training takes on the following responsibilities.

i-CSOC CLOUD

Provides solutions based on the model "Security as a Service".

- **i-THINK.** Cyberintelligence solution.
- **Portal de seguridad** (Security Portal). Cybersecurity integrated management.
- **FIRMA-E.** Digital signature solutions.
