

SUITAIR BIS

INDRA AIRLINES BUSINESS INTELLIGENCE

The right information at the right time for best decision making

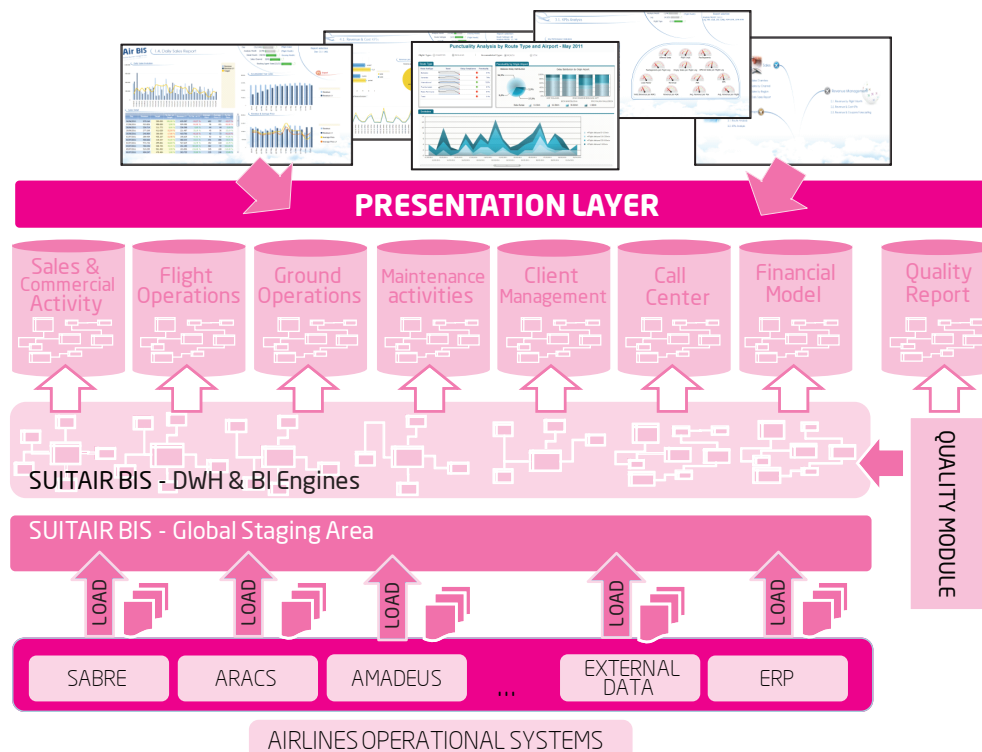

Challenge

SUITAIR BIS Competition in Airline industry is getting stronger each day. Having quick and accurate information available for early decision making becomes a competitive advantage.

Furthermore, as airlines are usually complex, sharing a single source of homogeneous and high quality information, with the possibility of analyzing main business processes across the organization, can help management control and improve the company on a constant basis.

Solution

SUITAIR BIS is a comprehensive solution covering the airlines main information needs in the areas of Commercial, Finance, Operations and Human Resources. More than 15 years of experience creating informational platforms allowed us to create a model based on best industry practices with a structured and scalable functional architecture

Benefits

- Cost Savings: Direct (design, development, testing) and Indirect (resources dedicated)
- Reduced Implementation time: interfaces with the main data sources, ETL, rules engines, etc.
- Knowledge transfer: functional model defined based on proven success stories with different airlines
- Change Management: Experience for reducing time of adoption and effective use

SUITAIR BIS KEY FEATURES

- Unified definition & storage of key information, ensuring quality, unique data and integrity
- Pre-defined reports, KPIs & dashboards
- Quality control & calculation engines for enriching data with new information
- Ready for mobile: key reports, KPIs and dashboards available for BlackBerry®, iPhone®, and iPad™
- Facilitates analysis of business processes across the organization
- It can be delivered as a service model (SaaS)

DESCRIPTION SUMMARY

Our solution follows the Pareto principle, providing 80% of common base to almost any airline. The remaining 20% is part of the work of custom implementation, which takes into account the specific requirements of each organization to tailor the solution to individual customer needs.

Therefore, we offer a standard solution based on industry best practices, and constantly evolving thanks to a community model where customers are actively involved in developing the roadmap.

The pillars on which the solution is based are:

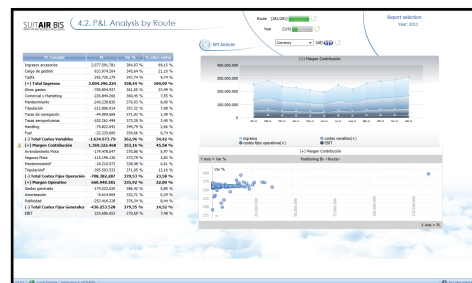

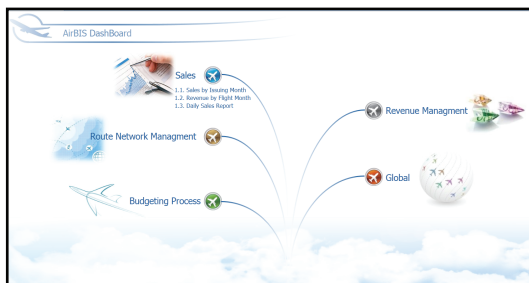

- Modular solution: 1 core & 8 optional modules available

- Standard solution with upgradable versions
- Structured and scalable functional architecture
- Configurable: calculation engines, business rules, security, Look & Feel,...
- Technology independent: Microstrategy & Board available in Cloud but possible to implement in any other BI tool

Scope

SUITAIR BIS covers the main areas of each airline:

- Commercial: Bookings, Sales, Revenue Management, Interline, Clients, Marketing, etc.
- Operations: Flight ops, punctuality, Ground Ops, Maintenance, Fuel & Other Costs analysis, etc.
- Human Resources: Productivity, Absenteeism, Monitoring agreements, costs, etc.
- Financial: Cashflow, Costs, Balance, Profit & Loss, etc.
