

## **INDRA, A COMPONENT OF THE DOW JONES SUSTAINABILITY WORLD INDEX FOR 12 STRAIGHT YEARS**

- **Indra is the only IT and Internet Service company in the technology subsector to remain on the DJSI World since its first inclusion in 2006, despite the increasing requirements and competition for entering and remaining on the index**
- **Indra's uninterrupted presence in the DJSI World is recognition of its commitment to value creation and ongoing improvement in the economic, social and environmental dimensions of sustainable development**
- **Indra has improved its score in Innovation Management, Human Capital Development and Labor Practice Indicators, and stood out for its Customer Relationship Management, Environmental Policy/Management System and Code of Conduct**

**Madrid, September 7, 2017.-** Indra is still a component of the Dow Jones Sustainability Indices (DJSI) World, having renewed its presence continuously for 12 years in this world benchmark index for sustainability. Furthermore, it is the only company in the IT Services and Internet sector that has remained on this selective world index since joining it in 2006.

The DJSI World fluctuates greatly, and the requirements for inclusion and remaining in it are increasingly competitive each year. Indra's continued presence as a world leader is a testament to its commitment to long-term value creation and sustainability, as well as to ongoing improvement of its performance.

In the 2017/2018 edition, Indra was one of 10 sector companies included in the Index, of the 83 companies worldwide invited to participate, thanks to its positive overall score in the economic, environmental and social dimensions. Indra improved its score particularly in aspects such as Labor Practice Indicators, achieving the highest score in the sector, and in Human Capital Development and Innovation Management.

Indra also stood out relative to the sector average in Customer Relationship Management, Environmental Policy/Management System and Code of Conduct.

The DJSI World, compiled by RobecoSAM, the investment firm specializing in sustainability, based on the S&P DJI methodology, selects the 320 most socially responsible companies from among the 2,528 largest companies in the world. Since 1999, the family of indexes that form the Dow Jones Sustainability Indices have been compiled with information requested previously from companies with the highest market capitalization, and serves as a reference index for the business and financial sectors. The information and data required to determine a company's inclusion in the DJSI World are obtained from a broad survey and public information on the companies, to which a rules-based methodology is applied to convert an average of 600 data points per company into one overall score. The companies that form part of the DJSI are publicly recognized as leaders in the social and environmental sphere, and as having significant economic activity.

### **About Indra**

Indra is one of the world's top consulting and technology companies, the absolute leader in IT in Spain, and a technology partner for the key operations of its customers' businesses worldwide.
