

## INDRA SUPPORTS LEÓN AS THE HEADQUARTERS OF THE EUROPEAN CYBERSECURITY INDUSTRIAL, TECHNOLOGY AND RESEARCH COMPETENCE CENTER

**Madrid, December 9, 2020.-** Indra demonstrates its full support for the Spanish proposal that the city of Leon should host the headquarters of the European Cybersecurity Industrial, Technology and Research Competence Center.

Indra is a specialized leader in the cybersecurity market in Spain and Portugal, both in terms of turnover for its high value-added services and for its human talent, with a team of more than 1,200 cybersecurity specialists.

The company has a Center of Excellence in Security and Software Development in León and maintains a team of specialists who work for the Spanish National Cybersecurity Institute (INCIBE).

Indra believes León is a magnificent location to successfully host technology, business and R&D centers integrated into global European networks, thanks, among other factors, to the excellent Spanish telecommunications network, based on the most extensive fiber optics network in Europe. And in terms of attracting and retaining European talent, the quality of life that the city of León can offer is also remarkable.

The company thus confirms its full support for the Spanish proposal and expresses its commitment to work closely with the European Cybersecurity Industrial, Technology and Research Competence Center in León, if this proposal is finally chosen.

Specifically, Indra undertakes to participate in forging alliances in the field of cybersecurity between the public and private sectors, to contribute to the creation of European capacities in cybersecurity and to participate even more intensively in the cybersecurity ecosystem already underway through the expansion, strengthening and improvement of its facilities and capacities based in León.

Indra's firm commitment to cybersecurity was reflected last January with the acquisition of SIA. The merger of SIA with Indra's cybersecurity business gave rise to a leading company with a distinctive added value proposition, complete, integrated and with a global presence. Currently, its cybersecurity solutions are implemented around three main axes: digital risk management, cybersecurity services and solutions, and digital identity and electronic signature.

### **About Indra**

Indra ([www.indracompany.com](http://www.indracompany.com)) is one of the leading global technology and consulting companies and the technological partner for core business operations of its customers world-wide. It is a world-leader in providing proprietary solutions in specific segments in Transport and Defence markets, and a leading firm in Digital Transformation Consultancy and Information Technologies in Spain and Latin America through its affiliate Minsait. Its business model is based on a comprehensive range of proprietary products, with a high-value, end-to-end focus and with a major innovation component. In the 2019 financial year, Indra achieved revenue of €3.204 billion, with more than 49,000 employees, a local presence in 46 countries and business operations in over 140 countries.
