

INDRA WILL ENSURE SAFE LANDINGS AT THREE AIRPORTS IN THE REPUBLIC OF KOREA

- **Indra has been awarded a contract for the delivery of air traffic navigation systems ILS and DME by the Korean Airport Corporation (KAC)**
- **The systems will ensure landing safety and operational stability at the airports of Ulsan, Muan and Yeosu, and was awarded based on Indra's solid technical competence within navigational aids**
- **Indra is already a major contributor to flight safety in South Korea, having implemented air traffic management and surveillance systems at airports and air bases across the country**

Madrid, October 20, 2021.- The Korean Airport Corporation (KAC) has awarded Indra a contract for the supply and installation of Indra's Normarc Instrument Landing Systems (ILS) and Distance Measuring Equipment (DME) with a total value of approximately EUR 6 million.

The systems are used by aircraft for navigating safely to the ground, and will be installed at the airports of Ulsan, Muan and Yeosu. In addition, KAC will have separate systems to be used for testing and training of technical personnel.

KAC already uses Indra's InNOVA tower systems at several airports, but this is the first contract for navigational aids. The contract has been negotiated together with Daeyang. The first delivery will be already in October 2021.

"Indra has been a professional partner in this and previous projects and has demonstrated their competence within navigation. We look forward to start using the Normarc navigation systems.", comments Yongcheol Lee, Manager, KAC.

"KAC's quality requirements are high, even for the air traffic industry. Yet, our systems have passed all flight checks. We are proud to be the preferred supplier and look forward to working with KAC on this project", says Tomas Lübeck, International Sales Manager, Indra.

About Indra

Indra (www.indracompany.com) is one of the leading global technology and consulting companies and the technological partner for core business operations of its customers world-wide. It is a world-leader in providing proprietary solutions in specific segments in Transport and Defense markets, and a leading firm in Digital Transformation and Information Technologies in Spain and Latin America through its affiliate Minsait.
