

INDRA'S CUTTING-EDGE TECHNOLOGY NOW MANAGES THE TRAFFIC IN LONDON'S SILVERTOWN TUNNEL

- Its In-Mova Traffic platform will optimize traffic over the 1.4 kilometers of this new infrastructure to guarantee maximum safety for drivers, reduce congestion and improve the connectivity of the east of the city
- The company has successfully implemented a complex project that includes intelligent transportation systems (ITS) and allows real-time monitoring of traffic and automated management to optimize detection and responses to incidents and emergencies
- Indra is shaking up the smart and sustainable mobility of the future in the United Kingdom, and its technology can also be found in the Hindhead Tunnel for National Highways, 12 road tunnels in London and the 90-plus kilometers of metropolitan roads connected to them

Madrid, May 23, 2025. – Indra has launched its advanced In-Mova Traffic platform to manage traffic on the 1.4 kilometers of the recently-opened Silvertown Tunnel in London, a key infrastructure for the city's urban mobility that connects the Greenwich Peninsula with the Silvertown district under the River Thames.

The company has successfully rolled out a complex integrated control system including intelligent transportation systems (ITS), communication systems, a radio communications network and traffic signals for Riverlinx CJV, the construction joint venture comprised of Ferrovial through its Construction division, BAM and SK Ecoplant.

Indra's technology permits real-time monitoring of traffic and highly automated management to optimize detection and responses to incidents and emergencies. It also makes it easier to generate reports that are key to decision-making and the design of operational strategies to guarantee maximum tunnel safety, operability and efficiency.

Indra's solution is integrated into the traffic infrastructure and road tunnels of London managed by TfL, the entity for which the company has deployed its technology in 12 tunnels that are vital for the city's mobility and safety, as well as the 90-plus kilometers of metropolitan roads connected to them.

In the United Kingdom Indra is also deploying its In-Mova Traffic platform in the Hindhead Tunnel for National Highways, thus reinforcing its leadership as a provider of advanced and innovative technological systems for transportation. With far-reaching experience in the undertaking of highly complex projects, the company's technology is already contributing to smart mobility in the region and over 50 countries and cities of international relevance in the field.

The company is also a technological partner of the NATS air navigation provider that's modernizing air traffic management in the United Kingdom and a member of the iTEC alliance that's deploying its state-of-the-art air traffic management system at European control centers.

With over 2,500 mobility projects in more than 100 cities around the world, Indra continues to foster solutions that make transportation and mobility more efficient, safe and sustainable in large conurbations such as Riyadh, London, Dublin, Amsterdam, Lisbon, Madrid, Sydney and Manila. Its latest projects include the contract for the management of the ticketing system for the entire public transportation network of Ireland, including streetcars, buses, the national rail network and the future Dublin Metro, thereby consolidating its standing as a technological partner that's key to the transformation of urban mobility.

About Indra Group

About Indra Group Indra Group (www.indracompany.com) is a holding company that fosters technological progress. It is made up of Indra, one of the leading global defence, air traffic and space companies, and Minsait, a leader of the digital transformation and information technologies in Spain and Latin America. Indra Group paves the way to a safer and better-connected future through innovative solutions, trusted relationships and the very best talent. Sustainability is an integral part of its strategy and culture in order to overcome current and future social and environmental challenges. In the 2024 financial year, Indra Group posted revenues totaling €4.843 billion and had a local presence in 46 countries and business operations in over 140 countries.
