

INDRA GROUP SIGNS CONTRACTS WITH THE EUROPEAN SPACE AGENCY TO REINFORCE SURVEILLANCE AND SECURITY IN SPACE

- It will evolve the S3TSR space surveillance radar to improve the detection of low Earth orbit (LEO) objects with greater accuracy and increase the protection of satellites and space assets
- As a key technological partner of ESA, Indra Group will develop advanced systems that enable satellites to receive Galileo signals with high reliability, enhancing positioning, navigation and timing both in space and on Earth
- Indra Space director Luis Mayo signed the contracts during ESA's 50th anniversary celebration ceremony, which was also attended by
- Indra's CEO, José Vicente de los Mozos, who declared that space and its synergies with defence are a strategic priority for Indra Group and key to Europe's strategic autonomy

Madrid, October 16, 2025. – Indra Group is strengthening its collaboration with the European Space Agency (ESA) through two new contracts that will reinforce Spain's and Europe's position in space surveillance and satellite navigation. The agreements were signed at the European Space Astronomy Centre (ESAC) in Villanueva de la Cañada during ESA's 50th anniversary celebration.

Indra Group CEO José Vicente de los Mozos emphasized that "as part of the company's commitment to ensuring the security of all citizens, space and its synergies with defence are a strategic priority for Indra Group. Together with ESA, we will continue advancing along this decisive path to strengthen Europe's security and strategic autonomy in the space domain".

The first contract covers the upgrade of the S3TSR space surveillance radar to its V2 version. The S3TSR is one of the most advanced systems in Europe and the world, owned by the Spanish Ministry of Defence and forming part of the S3T space surveillance and tracking system. This dual-use system is a key element of the Spanish contribution to the European Space Situational Awareness System (EU SST), dedicated to detecting and monitoring objects in low Earth orbit.

This upgraded version will significantly enhance current capabilities, enabling the radar to detect a metal sphere with a diameter of up to 44 centimetres at a distance of approximately 1,000 kilometres. Its modernisation will improve the protection of European satellites and space assets from unintentional accidental threats, such as space debris, and intentional threats, including satellites approaching with hostile purposes such as interference, damage or espionage on military assets.

More resilient and safer satellite navigation

Indra Group has also signed a contract for the LEO PNT ODTS+ project, part of ESA's NAVISP (Navigation Innovation and Support Programme), to advance the development of an electronic navigation receiver for low Earth orbit (LEO) satellites. The receiver will acquire and process high-precision Galileo signals to enhance positioning, navigation and timing (PNT) performance and synchronisation in space and on Earth. This will enable Indra Group to contribute to more accurate, reliable and resilient PNT services supporting key sectors such as transport, communications and infrastructure management.

With these new contracts, Indra Group strengthens its collaboration with ESA and consolidates its position as a leading supplier of advanced space technologies applied to defence. These initiatives reinforce Spain's and Europe's technological sovereignty through the development of next-generation capabilities in the space domain.

Indra Space, Indra Group is becoming one of Europe's leading players in the space sector, with the ability to cover the entire value chain of space projects, from mission design to satellite development and manufacturing, ground segment design and deployment and mission operations.

About Indra Group

Indra Group (www.indracompany.com) is a holding company promoting technological progress that comprises Indra, one of the main global defence, air traffic and space companies, and Minsait, a leader of the digital transformation and information technologies in Spain and Latin America. Indra Group drives a safer and better-connected future through innovative solutions, trusted relationships and the finest talent. Sustainability is part of its strategy and culture, in order to respond to present and future social and environmental challenges. In the 2024 financial year, Indra Group posted revenues totalling €4.343 billion, with a local presence in 46 countries and business operations in over 140.
