ELECTRONIC PAYMENT SYSTEMS

### How can we help you?

In a globalised and decentralised business world, **exchanging documents and information between organisations** must be a controlled cost and offer speed, **delivery guarantees, security and legal validity**, with as little impact on the environment as possible.

The Digital Markets division helps companies to join the digital world, providing **integrated solutions and collaboration scenarios** that enable our customers to optimise their relationships with their trading partners (customers and suppliers) and **increase productivity**.

### Expert knowledge

Our main value is based on the constant innovation of our collaboration models and solutions, in order to address the needs of our customers.

Solutions for:

- The management of provisioning and financing.
- E-invoicing and certified invoice digitalisation systems to create paperless environments.
- Solutions for the management of communications between companies and organisations.
- Specific applications for the operational management of payments/collections.
- Specific digitalisation and automation solutions, adding value to business processes.

### Experience

We have helped more than 2,000 companies increase the value of their processes:

- All Spanish financial entities use our products for their transactions.
- We manage 92% of EDI document traffic in the car industry: more than 600 suppliers interconnected, exchanging some 3.15 million documents per year.
- 80% of major Spanish banks use our systems to automate their banking processes (more than 100 million operations per year).
- More than 1 million credit card payments processed per day.
