# InCMS CUSTOMER MANAGEMENT SYSTEM

With more than 25 years of proven expertise, InCMS is the Indra's solution that caters for the needs of utilities in regulated and competitive markets regarding the customer relationship and commercial activities management

## A system specially designed for Utilities from the own Utilities experience

InCMS is an integrated, modular, Web system designed to support customer management for utilities. Its functional structure, rich, flexible and highly configurable, was designed to respond to the requirements of a constantly evolving dynamic market.

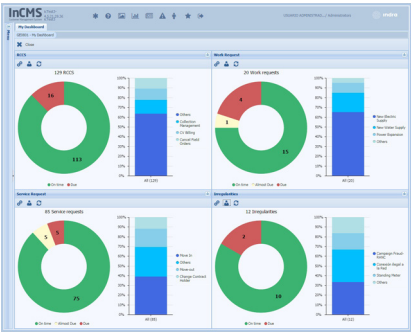

InCMS design aims at optimizing the most important concepts of the commercial cycle in utilities: customer loyalty, sales growth, cost reduction and prompt decision making.

InCMS provides all necessary information for daily operations and notifies the activities, to the different management levels in order to facilitate processes decision making.

InCMS is the result of the evolution of consecutive implementations in utilities throughout the world. It offers a multi-service solution to companies that manage several services.

Indra's InCMS solution keeps as an acknowledged player, according to Gartner's Magic Quadrant, for several years and stands in the IDC MarketScape customer care and Billing.
