indra

URBAN SECURITY

Indra provides solutions to manage an effective response to daily incidents and emergencies through a common incident operative.

The Integrated Security and Emergency Center fulfills two functions: guaranteeing citizens' welfare and protecting the city's vital infrastructures.

THE CHALLENGE OF COORDINATED OPERATIONS

New threats (population growth, complex urban security, terrorism, natural disasters, etc.) advise to review the current urban security systems, based on the principles of citizen care, prevention and response anticipation.

INDRA PROVIDES URBAN SECURITY SOLUTIONS THAT COVER THE FULL PROCESS OF SECURITY IN A CITY

INDRA SOLUTIONS ARE CURRENTLY PROTECTING MILLIONS OF CITIZENS

Classic mechanisms have proved to be limited solutions with regard to Urban Security, making it necessary to achieve a higher operative coordination between security and emergency bodies.

Indra provides proven experience track in security systems and a wide range of services and solutions adapted to the needs of each municipal or regional government

Information systems which are open, flexible, integrable with corporate systems and capable of adding in the future new features or services.

**Integrated Security and Emergency Management Center**
• Center design and implementation.
• Voice and audiovisual systems.

Urban security management model
Intervention services work globally, giving a unique insight to the incidents, which enables a common planning of the preventive policies.

Public attention systems
• Call centers to receive and manage incidents.
• Institutional Web Portals.

iSAFETY

INCIDENT Public Attention Video Surveillance Alert Network	**REGIONAL RESPONSIBLES AND OFFICERS** support for the decision-making
	INTEGRATED CENTER OF SECURITY AND EMERGENCIES Operations Center / Emergency Center Infrastructures & Communications
RESPONSE Operative Coordination Security Forces	Integration with EXTERNAL AGENCIES

iSAFETY. INTEGRATED SECURITY MANAGEMENT AND EMERGENCIES SYSTEM

iSAFETY provides real time information to the authorities, enabling an optimal response.

1. RECEPTION
Receives, locates and classifies incidents from the assistance and prevention systems.

2. DISPATCH
Proposes best resources based on its status, GPS position and defined procedures.

3. TRACKING
Controls tactical situation of the resources and interacts with the involved agencies.

4. REPORT
Executive information: dashboards, risk maps and customized reports.

iSAFETY allows emergencies coordination and tracking.

Integrable system with existing solutions in the client.

Each body knows the status of the resources involved, and they have the ability of requesting other bodies' services in order to speed up the response.

Integration with video surveillance networks, voice and radio
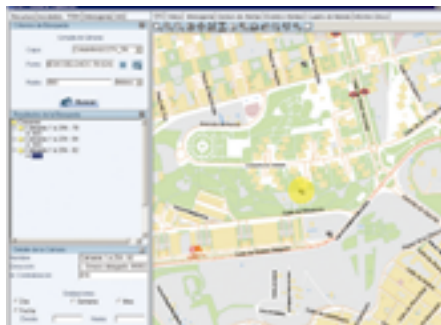

INTEGRATION WITH CARTOGRAPHY AND GIS SYSTEMS
